Detailed Action

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 23-39 are rejected under the judicially created doctrine of obviousnesstype double patenting as being unpatentable over claims 1, 9, and 15 of U.S. Patent No. Application/Control Number: 10/807,939

Art Unit: 2665

6,735,175. Although the conflicting claims are not identical, they are not patentably distinct from each other because

Regarding claims 23-39, applicant's claims 23, 31, and 37 merely broaden the scope of the patent number US 6,735,175 by eliminating the terms: "algorithms through Dual Tone Multi-Frequency commands received by a controller" in claim 1; "Dual Tone Multi-Frequency tones", and "through Dual Tone Multi-Frequency commands received by a controller" in claim 9; and "flash feature and Dual Tone Multi-Frequency commands" in claim 15 of the patent. It has been held that the omission of an element and its function is an obvious expedient if the remaining elements perform the same function before. In re Karlson, 136 USPQ 184 (CCPA). Also note Ex Parte Raine, 168 USPQ 375 (bd. App. 1969); omission of a reference element whose function is not needed would be obvious to one skilled in the art.

Allowable Subject Matter

3. Claims 24-30, 32-36, and 38-39 are objected to but would be allowable if their respective independent claims 23, 31, and 37 overcoming the nonstatutory double patenting rejection set forth above.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Scoggins et al. (US 6,832,254); Caugherty (US 6,597,702); Shmulevich et al. (US 6,515,985) are cited to show changing quality of service for voice over IP calls, which is considered pertinent to the claimed invention.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Duc Ho whose telephone number is (571) 272-3147. The examiner can normally be reached on Monday through Friday from 7:00 am to 3:30 pm.

If attempt to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Huy Vu, can be reached on (571) 272-3155.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (571) 272-2600.

The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

6. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
